FUEL SAVING
AND LOW
EMISSIONS

POWERFUL PARTNERSHIPS

Bulk Transfer Systems

Closed loop refilling of lubricants, fuel and grease to facilitate higher transfer rates while preventing contamination and reducing the environmental impact. The IFS standalone transfer stations set the trend in industry.

- Enclosed Units • Metering • Skids • Grease Rams • High Flow Nozzles • Pumps • Couplers •

Operator Interface & Control Systems

Minimise in-cab activity with a comprehensive information centre to enhance operator comfort, concentration and risk management. Centralised display of eripheral equipment information.

- Engine Management • Terrain Monitoring Systems • Voice Command Warnings • Operator Authentication • CCTV •

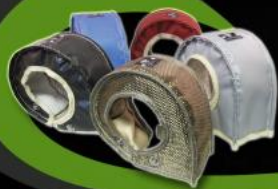

Workshop Equipment

A comprehensive range of trolleys, pumps, hose reels, meters and dispensers for materials handling in the workshop.

- Hose Reels • Oil Trolleys • Grease Pumps • Evacuation Pumps • FRL • Flow Meters • Dispense Handles •

Thermal & Fire Protection

Customised solutions designed to contain heat transfer and address fire and personnel risk. Improved thermal efficiency will have a positive impact on performance. RE-active systems successfully address the prevalent fire hazards brought on by excessive heat sources.

- Turbo Covers • Heat Sleeve • Fire Suppression • Thermal Wrapping • Spray Diffuser sleeve • Temperature Monitoring •

Automated Lubrication Systems

Automated or manual greasing systems for earthmoving, mobile and stationary equipment to prolong service life and minimize downtime. IFS is recognised as the preferred installation partner for various OEMs and maintain the highest quality standards.

- Injectors • Progressive Systems • Mobile Installation • Field Service • Grease Refill • Pump Stations •

Specialised Mobile Units

Service Trucks, Diesel Bowers, Water Bowers and Special Combination units are furnished with all necessary equipment to deliver fuel, oils, oil evacuation, coolant and grease functions safely and conveniently for improved productivity.

- Optimised Design • Large Payload • Versatile Layout • Screw Type Compressor • Rentals •

Powerful Partnerships

Industrial Fluid Solutions (IFS) is a specialized supplier of Fuel and Lubrication Handling equipment. Based in the coal producing capital of South Africa, Witbank, we distribute throughout South and Southern Africa with a distribution network reaching as far as Ghana in West Africa.

Established in 2003, this family owned business now offer mobile technical services, in-house design and fabrication as well as turnkey project management focussed on the heavy industrial and mining markets. With a dedicated design and manufacturing team supporting the mobile field service crews, the development of specialised service vehicles for mining applications has secured the company's position as a leader in the off-highway transport and dispensing of fuel and lubricants. Not only does these unique mobile units set the standard for rugged and durable platforms, but through optimizing payload and increased pump rates we can now reduce turnaround time while offering higher levels of contamination control.

Finally consolidating the leading position in a highly competitive market, is the strategy to offer 24-hour on-site support, delivering unparalleled levels of commitment which grows stronger end user relationships.

Core Values

Professionalism - Attitude - Teamwork - Integrity - Ownership

Mission Statement

"At IFS we value relationships and are committed to exceed expectations by delivering excellent service. We are proud of our culture and aim to be the leaders in our field."
